Kunal Suravkar

Associate Application Developer

As an associate application developer at oracle financial service software , I've sharpened my full stack development skill, delving deep into Java , Javascript, OJET (Oracle Javascript Extension Toolkit) . I've masterfully developed multiple UI screen and backend functionality for CFE application during my tenure at oracle financial service software. Prior, I was associated with the BNP Paribas on an assignment in the RISK IT Department. I hold academic credentials from Veermata Jijabai Technological Institute and University of Mumbai. Eager to learn and expand my knowledge, I've initiated learning Scala. A team player who can add value to the organization.

INTERNSHIPS

Software Developer Intern — Jan '21 - Jun '21

BNP Paribas — Mumbai

- **Front-end Development:** Gained Hands-on expertise on angular development through active involvement in development of New CPA application, in which I contributed to the development and maintenance of UI screens using Angular framework.
- **Debugging and Bug Fixing:** Successfully resolved bugs in CPA application and ensured stability and reliability of application.
- **CPA SSRS Migration to Power-BI Server:** Spearheaded the enhancement of the CPA (Credit Processing Application) by implementing a feature to seamlessly integrate Power BI reports hosted on Microsoft SharePoint.
- **Testing & Quality Assurance:** Added new test cases using Junit framework also conducted unit testing for each task, and upheld stringent code quality standards.

PROFESSIONAL EXPERIENCE

Associate Application Developer — Jul '21 - Present

Oracle Financial Services Software — Mumbai

- **Full-Stack Expertise:** Proficient in full stack development, adept at leveraging a diverse set of technologies to build end-to-end solutions. Skilled in front-end development using **Oracle JET (JavaScript, HTML, CSS)** to create responsive and interactive user interfaces. Experienced in backend development, utilizing **Jersey for REST API** creation and **Helidon MP** for microservice architecture, ensuring robust and scalable backend functionality. Additionally, experienced in containerization and orchestration technologies like **Docker and Kubernetes** for continuous integration, delivery, and deployment, facilitating seamless and efficient development workflows.
- **On-Premise to Cloud Migration using mircroservices architecture:** Contributed to the successful migration of CFE from on-premise infrastructure to a cloud-based microservices architecture. Collaborated closely with cross-functional teams throughout the planning, execution, and testing phases of the migration process, ensuring a smooth transition and minimal disruption to operations. Played an integral role in architecting scalable microservices, optimizing performance, and enhancing reliability in the cloud environment. Resulted in improved flexibility, scalability, and cost-efficiency for the organization.
- **Performance Optimization**: Utilized the latest Java 21 feature, virtual threads, to optimize backend processing, resulting in a notable reduction in screen loading time. Additionally, integrated content delivery network (CDN) and conducted code minification to streamline front-end resources, enhancing page loading speed. Implemented asynchronous calls to further improve responsiveness, ensuring a seamless user experience.
- **Integrated metrics monitoring tools:** Successfully integrated **Prometheus and Grafana** into CFE microservices, enabling comprehensive monitoring, analysis, and visualization of key performance metrics in real-time. This implementation empowered the team to proactively identify and resolve performance bottlenecks, optimize resource utilization, and ensure the scalability and reliability.
- **Debugging & Quality Assurance:** Proficient in practicing **SAFe (Scaled Agile Framework)** methodology for software development, ensuring efficient collaboration and delivery within cross-functional teams. Successful completed the **SAFe 5 practitioner** course and received the certification.
- **Awards & Recognition**: Received **ERF Champion(2023)** and **Pacesetter award (2024)**for Quick learner and developing multiple UI screens in CFE cloud service.

EDUCATION

Veermata Jijabai Technological Institute, Matunga May '18 - Jun '21

CPI: 7.96/10

University of Mumbai May '15 - Jun '18

GPA: 6.50/7

PROJECTS

- **Teacher Recruitment Portal (03/2020-05/2020)**: Engineered a comprehensive job portal focused on teacher recruitment, leveraging technologies such as EJS, Express.js, Node.js, and MongoDB.
- **Visual Path Finding (09/2019-11/2019)**: Developed an intuitive path-finding application utilizing Python to visually illustrate and solve navigational challenges.

TECHNICAL SKILLS

Front-end Development: OJET , Require JS, Knockout JS, Angular, HTML5, CSS3, JavaScript

Database & Server: Oracle Sql, Apache Tomcat, Jetty

Back-end Development: Java, Helidon MP, Jersery, Spring boot

Version Control & Development Tools: Git, Cloud lab, IntelliJ Idea, Eclipse

Containerization & Deployment Tools: Docker, Kubernetes
